Watanabe, T. 209

Zilberman, D. 111

Subject Index

Acid deposition, meteorology 329
Analysis of remotely sensed data 41
Athens Lead Experiment 275

Biogeochemical cycles 243
Bioindicators, of heavy metals pollution 339

Chinese special economic zones, development 147
Climate, The World Climate Programme 197
Conservation of ancient monuments 365

Desertification, economic factors 101
Desertification, of semi-arid zones 91

Environmental studies, in less-developed countries 165
Eutrophication, modelling of prediction of and recovery 261
Eutrophication, the rôle of phosphates 229

Fine-grained sediments, transport 219
Frontier environments, conditions for successful development 111

Greenhouse gases, climatic consequences 177

Heavy metals transport, rôle of suspended matter and bottom sediments 243
Heavy metals, pollution from industry 339
Heavy metals, wet deposition 311
High sea levels, conditions associated with 251

Lake management, modelling prediction and recovery of lake eutrophication 261
Land-use practices, and desertification 91
Landscape conservation 387
Lead, fraction of blood-lead due to gasoline-lead 275
Less-developed countries, environmental development 165

Model of society's total environment 157
Modeling environmental and resource planning techniques 285

Natural resource availability 3
Natural resource degradation 129
Natural resource management, economic models 121
Nitrous oxide, emission from soils 27
Nitrous oxide, increasing atmospheric concentration 27

Nuclear plants, management 59
Numerical water quality estimation for organic river pollution 209

Organic river pollution, water quality estimation 209
Organochlorine pesticides, residues 321

Phosphates, rôle in eutrophication 229

Remote sensing, for global studies of terrestrial vegetation 187
Remotely sensed data, analysis 41

Soil humic acids, complexation 351

Wet deposition of acid and heavy metals 311
